

If your pet is a senior and is experiencing one or more of the following signs, be sure to bring it to our attention at your next appointment, along with any other concerns you may have about changes in your pet's behavior. What may look like normal aging could be a manageable condition.

Signs	Yes	No
Difficulty climbing stairs		
Difficulty jumping up		
Increased stiffness or limping		
Loss of housetraining, house soiling		
Changes in litter box habits, inappropriate elimination (cats)		
Increased thirst		
Increased urination		
Changes in activity level		
Excessive panting or changes in breathing patterns		
Circling, repetitive movements		
Confusion or disorientation		
Excessive barking/meowing		
Less interaction with family/hiding		
Decreased responsiveness		
Tremors or shaking		
Skin or hair coat changes, lumps or bumps		
Excessive scratching		
Changes in sleeping patterns, location		
Less enthusiastic greeting or behavior		
Altered appetite		
Weight change		
Bad breath
